CART DUMPER

**Increase performance speeds over
35% and improve safety by reducing manual labor**

CART DUMPER

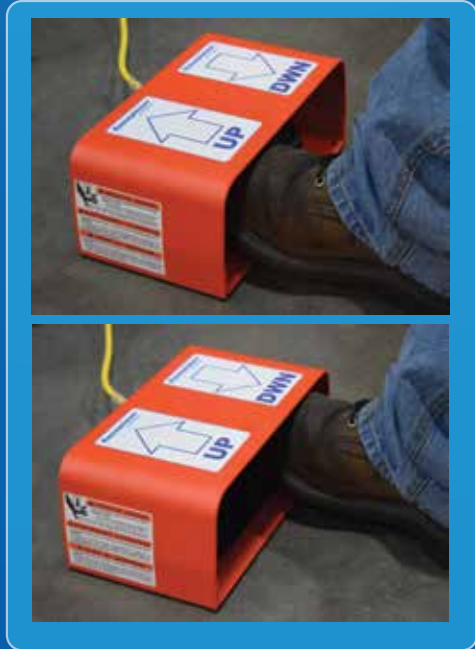

Kannegiesser ETECH Hydraulic Cart dumpers are engineered from heavy-duty components. A fully welded frame and carriage that provides strength and dependability for consistent daily use.

With hands-free controls, high-performance drive units, UL-approved controls, and a 2,000-pound capacity. KE cart dumpers can increase performance and process speeds by over 35% and improve safety by reducing manual labor.

Economical and safety-conscious solutions that are low maintenance, quiet and clean to exactly fit your soil sorting areas demands.

Prevent work-related injuries by eliminating all the heavy lifting and also improve operational efficiencies.

Hands-free controls

Plastic deflector bridges the gap between the cart dumper and the breakup table

New Design Benefits

- A wider and longer carriage that will work with a wide variety of industry standard carts such as the 72P.
- New cycle time is **27 seconds!**
- The entrance of the cart dumper is equipped with a standard safety chain and/or an optional safety scanner. The safety scanner scans a predefined zone, if anything breaks this zone operation stops until the zone is clear and the scanner is reset, delivering optimal safety.
- The carriage now has replaceable plastic wear pads, to protect the carriage from wearing on the carts, & vice versa.
- Adjustable hydraulic cylinders and power units with valves that can be manually fired.
